## The Synchronicity Engine technology

The Synchronicity Engine™ technology creates a life-enhancing 'Chi'-like Morphogenic<sub>1</sub> field

This technology uses computer hardware/software as an integrated 'transducer' system to convert electrical patterns into constantly evolving 'Chi' energies – the foundation of the 'Tao' life-force paradigms

The computers, programmed with advanced algorithms based on fractal mathematics and chaos theory, which is an extension of quantum physics, generate the Synchronicity Energy field

This revolutionary Synchronicity Energy technology has been presented at medical conferences over the past years and is used in clinics worldwide

Some of the Mind/Body Benefits observed are:

- Promotes longevity and aids in slowing the aging processes
- Enhances whole mind/body purification/detox disciplines
- Energizes the body and helps balance Life-Force energy flows
- Increases alertness, learning and creative problem solving

## Creation of the Synchronicity Engine technology

Over the last several decades I've addressed the question of the link between matter and consciousness. The firmest ground I found to start with is Dr. Carl Jung's theory of Synchronicity.

Dr. Carl Jung

### Synchronicity in Brief

"The concept of Synchronicity indicates a *meaningful coincidence* of two or more events, where something other than the probability of chance is involved. Chance is a statistical concept that 'explains' deviations within certain patterns of probability.

Synchronicity elucidates meaningful arrangements and coincidence, which somehow go beyond the calculations of probability. Precognition, clairvoyance, telepathy, etc. are phenomena which are inexplicable by chance, but become empirically intelligible through the employment of the principle of Synchronicity, which suggests a kind of harmony at work in the interrelation of both psychic and physical events."

Synchronicity - An Acausal Connecting Principle 2

## Synchronicity Energy

This Synchronicity Energy, as Dr. Carl Jung described, is the basis for the 5000-year-old practice of Oriental Medicine and the I-Ching techniques. The flow of this energy, sometimes referred to as **Chi**, is fundamental to Oriental Medicine practices such as Acupuncture and Chi-Gung.

In Acupuncture theory, this life force flows through the body and the various Acupuncture techniques create, stimulate and move these energies throughout the body. Similarly, Fung Shui also uses intuitive techniques to alter environments to increase and optimize the flow of Chi through living spaces.

Martial Arts masters and Advanced Yoga masters use this life force flow in their disciplines. They have the ability to project this energy outside their bodies through walls and other objects. And, indeed, Chi masters outside the rooms where the SyncWave System is operating have sensed the Synchronicity Energy produced by the Synchronicity Engine technology.

### I-Ching – A Synchronicity Detector

Dr. Jung described one of the existing systems that use Synchronicity: the I-Ching. The I-Ching is one of the early systems that were created to detect Synchronistic Energy/ Patterns. (Decades later theoreticians formalized part of the underlying physics: now called "Chaos Theory/ Fractal Mathematics".)

### Generation of Synchronistic Energies

It occurred to me that since these systems, which Dr. Jung spoke of, were 'low-tech' receptors of synchronistic energy/ patterns/ organization/ etc., it should be theoretically possible to create a new technology that would generate of these Synchronicity energies.

The flip side of the 'Synchronicity' coin: a ***Synchronicity Engine***.

A technology that would increase the interconnectivity of Life and the flow of the Life-Force – the Chi

Over two decades ago, I embarked on creating such a technology.

## The Search . . .

First I examined existing scientific, historical and metaphysical literature to see if there was anything concrete I could use.

Unfortunately, with the exception of Dr. Jung's work on Synchronicity, there wasn't anything useful (**Chaos Theory** had not yet been invented. There is an excellent book: Chaos: Making a New Science<sup>3</sup>, by James Gleick, written about a decade ago, that discusses the discovery of Chaos theory and its implications).

Chaos: Making a New Science<sup>3</sup>, by James Gleick

## Creating the Synchronicity Engine technology

After years of considering the concepts, formulating theories and postulating possible designs, in 1989, I finally sat down and started designing a computer system that would, hopefully, create Synchronistic Energy. I used concepts from chaos theory and fractal mathematics, music, meditation and chanting. I "tuned" or adjusted the patterns intuitively, for maximum perception effect.

Perhaps the best way to describe the effect when the system is run is that people report an *Awareness . . . a Presence*, is created in the room.

As the effect builds, one's perception is of being in a conscious, evolving creation - One that, as Dr. Joseph Campbell would put it in his Power of Myth series, "*Directly touches The Transcendental*".

The Power of Myth, by Joseph Campbell

## SyncWave System

These first attempts were remarkable successful in creating Synchronistic energies. Since then, over the last decade, I've refined the technology and created the **SyncWave™** System based on the Synchronicity Engine technology.

2-unit **SyncWave** System

Over time, as the SyncWave system runs, the effect builds up to the feeling of being in a grotto or in a Cathedral (or in 'Giant Sequoia Forest Cathedral').

The effect has been described as follows:

*“When I entered, it was like touching the face of God”*

## The Force

Over the years, I've come to view this Synchronicity Energy as equivalent to the '**Force**' in *Star Wars*. Several years back, I read that George Lucas had patterned the '**Force**' as a unified concept derived from many mythic/ shamanistic/ spiritual disciplines from around the world. The Jedi Philosophy he created has this equivalent of Synchronicity Energy – The Force - as its core organizing principle.

Thus was **Jedi Technologies** born . . .

Technologies for the Mind/Matter paradigms just now emerging . . .

## References

The definition of a **transducer** is a device that converts one form of energy to another.

For example, SONAR converts electricity into acoustic energy (sound waves traveling underwater). SONAR is an integrated hardware/software system that first uses software to create complex wave patterns. Those patterns are then sent to underwater transducer hardware. This underwater transducer then converts those patterns into underwater acoustical energy, which is transmitted through the water.

Similarly, the Synchronicity Engine technology uses Fractal Mathematics (the coupled non-linear equations at the foundation of Chaos Theory) to create complex wave patterns. It then uses the computer hardware as a transducer to create and emit Synchronicity Energy into the environment.

Synchronicity Energy doesn't lie within the Electro-Magnetic (EM) spectrum, just as the energy produced by SONAR also lies outside the EM spectrum.

**trans·duc·er** (trāns-dŭs'ər, -dyŭs-, trānz-)

*n.*

A substance or device, such as a piezoelectric crystal, microphone, or photoelectric cell, that converts input energy of one form into output energy of another.

---

[From Latin *trānsdŭcere*, *to transfer* : *trāns-*, *trans-* + *dŭcere*, *to lead*; see *deuk-* in Indo-European Roots.]

1. “The quantum world is teasing and enticing in many ways. Fields fit right in. They are, as biologist Rupert Sheldrake describes them, 'invisible, intangible, inaudible, tasteless and odorless' (1981, 72). They are often unapproachable through our five senses; yet in quantum theory, they are as real as particles . . . This leads to a puzzling situation. Physical reality is not only material. Fields are considered real, but they are non-material.  
”Sheldrake has created an intriguing concept of fields in biology. He has postulated the existence of Morphogenic fields that govern the behavior of species. This type of field possesses very little energy, but it is able to take energy from another source and shape it. The field acts as a geometrical influence, shaping behavior. Morphogenic fields are built up through the accumulated behaviors of species' members (Sheldrake 1981, 60).”
